

Delphi / Back End Developer

Job Description

MDN LABS

MDN Labs

Summary

MDN Labs is seeking a Senior/Associate Delphi Developer with strong project management skills to join our innovative insur-tech team.

Based in Patras, Greece, with hybrid work options, this role involves designing, developing, and implementing high-quality software solutions, leading project planning, and mentoring junior developers.

If you are passionate about combining your technical expertise with project management to drive projects to success, we want to hear from you.

Job Type: Full time

Location: On-site / Hybrid

Salary: Negotiable

About MDN Labs

MDN Labs is a boutique software house, providing innovative IT solutions to clients worldwide. We are renowned for our proficiency in developing, implementing, and managing IT infrastructures and solutions.

We are based downtown in Patras, Greece.

Responsibilities

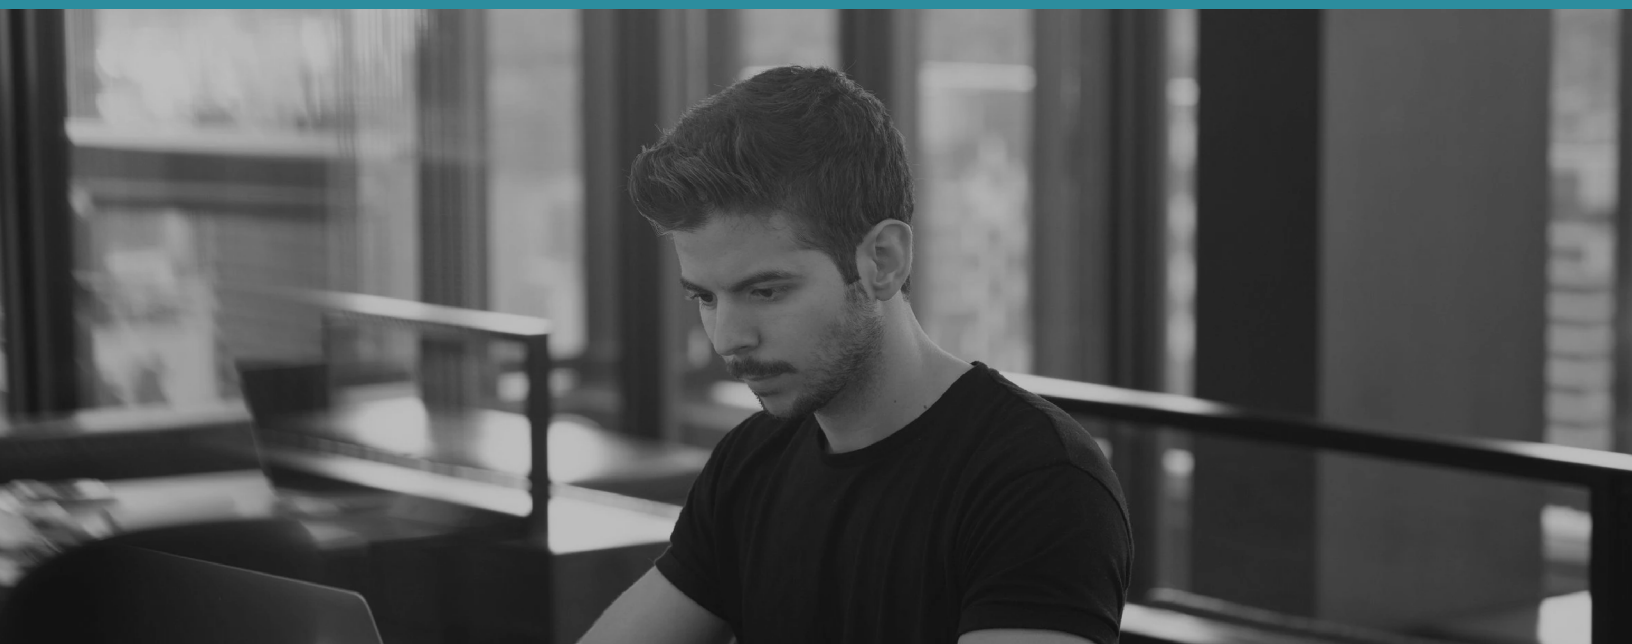

- Collaborate with our development team to design, develop, and implement high-quality software solutions using Delphi.
- Undertake full software development lifecycle, including gathering requirements, designing, coding, testing, debugging, and deployment.
- Lead or contribute to project planning and execution, ensuring deliverables are met on time and within scope.
- Apply project management methodologies to track progress, manage risks, and communicate effectively with cross-functional teams.
- Mentor and guide junior developers, fostering their growth and technical expertise.
- Stay up to date with industry trends and best practices, suggesting improvements to enhance our software development process.
- Participate in code reviews, ensuring code quality, performance, and adherence to coding standards.

Requirements

- Bachelor's degree in Computer Science, Software Engineering, or a related field.
- Proven experience in software development using Delphi, with a strong understanding of Object-Oriented Programming (OOP) principles.
- Experience in project management and stakeholder communication.
- Proficiency in database design and development, SQL, and relational database management systems.
- Strong problem-solving skills and the ability to troubleshoot complex software issues.
- Excellent communication skills, with the ability to collaborate across teams.
- Self-motivated, proactive, and able to work independently as well as in a team.
- [For Senior role] Additional years of experience in software development, project management, or related areas.

Preferred Qualifications

- Familiarity with Python development, JAVA, and NLP.
- Experience in insur-tech, fin-tech, and business intelligence.
- Certifications in project management or software development.
